

Elements Of Community Inc

We Inspire, Empower, Enlighten Children & Community

Elements of the Community Inc, a social enterprise that provides inspiring, empowering and enlightening opportunities for inner city youth and their communities. We believe that everyone is an Element of the Community. We know that healthy elements released into the community reflect a positive environment for everyone. We believe that what we offer will change habits and patterns of inner city children, families and community. We feel like we're different from other organizations because we stay up to date with today's trends and best practice in regards to Economics, entrepreneurship and Media. We are committed to helping children and their families become life long learners, socially responsible, self sufficient, productive financially free citizen of their community. We are dedicated to cultivating the mind, land and economic structure of inner city communities. We're special because we offer services like E3 Education, Empowerment & Entrepreneurship sessions, Mathematics of Money workshop, Youth Film & Journalism Sessions and Inner City Children's Fund.

- **Inner City Children's Fund**

The Inner City Children's Fund was created to give everyone one an opportunity to continue their education and /or develop a start up businesses. The zip code should not determine their outcome. We are removing barriers and giving inner city children a fair chance at life. The Inner City Children's Fund provides 529 college savings plans and or invest in startups launched by inner city youth.

For more information contact InnerCityChildrensFund@gmail.com

- **Mathematics of Money Workshop**

Mathematics of Money provides students with the mathematical background in concepts of business, finance and entrepreneurship for life long practical use. Students will investigate the mathematics of saving and investing while buying and selling through applying these principles to personal and real world scenarios. Topics include simple interest, simple discount, compound interest, annuities, investments, retirement plans, mortgages, student loans, leasing, insurance, stocks and more. The course is designed to introduce and reinforce basic skills to integrate into learning of finance, business and entrepreneurship to increase

financial capabilities. The adult version of “Mathematics of Money” is “Money Management for the Family” to help assist parents with learning or enhancing the same concepts and apply to the family structure. Mathematics of Money because we know that Money Matters.

- **Youth Film & Journalism Sessions**

Our mission is to educate the youth in all aspects of the media. Give them hands on experience with equipment, networking and production of marketing strategies. We specialize in photography, film, marketing and developing media strategies for independent companies and artist. We see the need for development of not only talent but for business professionals as well. Today’s youth are bombarded with images of artists in front of the camera, without truly understanding. We have courses in video production, editing, journalism and many more. These classes are for students and parents of all ages to help them tell their stories.

- **E3 Education, Empowerment & Entrepreneurship sessions**

We visit inner city schools, organizations and churches to spread the word about Education, Economics and Empowerment to help establish and maintain healthy habits for youth and their communities. We provide exposure, resources and the best practice for increasing financial capabilities. We will help create change and transformational scale. Although we do these sessions all year around April is financial literacy month and we dedicate every day to help foster financial capabilities in families and their communities. The Youth Financial Reality Fair, Youth Entrepreneurship, Summer Camp and so much more is planned to empower the community.

- **Tech Hub**

Due to the technology gap, we believe that it was essential to team up with other Community organizations and create a student focused and student facilitated Technology Hub. This hub will teach the children and their community about Agriculture, 3D Printing, Photography, Crypto-currency, coding and so much more. Stay tune for more details.

We are looking for interns and volunteers that are interested in the technology Industry or Film production <https://forms.gle/QvcjPY4fnV14oDbF9>
